PICO SLIDING SYSTEM

Description

- one of our smallest sliding door system PICO runs with enormous precision, as the upper track is reduced to a minimum special rollers guarantee for smooth sliding at all times. With the three weight options a suitable system is available for every application. The maintenance-free units allow for a gentle and quiet movement of the sliding panels. By means of the integrated height-adjusting mechanisms the panels can be easily adjusted. The upper tracks can be fixed to walls as well as ceilings which allows for a great flexibility in design.
- one or two panel sliding door system with/without fix panel

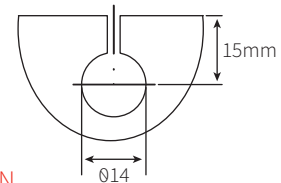

PICO SLIDING SYSTEM
MAXIMUM WEIGHT PER PANEL 150KG

Item number	MS150
Description	<ul style="list-style-type: none"> • PICO sliding system maximum weight per panel 150kg • maximum dimensions 1.5 meters x 3 meters • minimum width of panel 500mm • kit includes <ul style="list-style-type: none"> – two trolleys, length 160mm each – two limit stop buffers – one bottom floor guide
Suitable for	• 8mm, 10mm and 12mm glass thickness
Material finish	• two different kinds of upper tracks are available in anodised aluminium in various colours: with or without side fixed panels
