SV-Sincro X110

Technical Details

THE MULTIPL COMPACT GLASS RANGE IS THE BEST CHOICE FOR CLOSING LARGE SPACES WITH MULTIPLE GLASS PANELS, WHILE ENSURING AN ATTRACTIVE MINIMALISTIC DESIGN THANKS TO ALL COMPONENTS BEING CONCEALED WITHIN THE TOP TRACK, PROVIDING A COMPLETE FRAMELESS INSTALLATION.

The SV-Sincro X110 system is designed to close spaces with two synchronized panels, these opening and closing simultaneously. Suitable with glass thickness of 10 mm and 12 mm, with an easy installation of the glass with no machining required (template or laminate), and with a weight capacity of 110kg per panel.

In addition, it incorporates as a novelty **SOFTPRO**® technology by Saheco, a braking system that brings greater smoothness and safety with a soft opening and closing of the installation.

The system has been tested in 100,000 cycles according to European regulations EN1527 / EN1670.

SOFTPRO[®]

TECHNOLOGY by Saheco

The new soft-closing technology from Saheco which combines two nitrogen gas filled pistons and one oil filled piston all within the same unit.

1. Fully adjustable closing speed. **2.** Closing action is progressive and slows down as the door approaches the fully closed position. **3.** Soft Closing. **4.** Anti break feature on the trigger. **5.** Ensures safe braking and prevents the bouncing of the door. **6.** Combines an aesthetically pleasing action with safe soft closing for the last 65mm of the door's travel into the fully closed position for door weights up to 110Kg .

① Anti break trigger

② Nitrogen gas filled pistons

③ Oil filled piston
