SV-X110
Technical Details

SV-X110 is a compact sliding solution for frameless glass panels, combining latest technology with an attractive minimalist design. The system is quick and easy to install, and is particularly appropriate for domestic and commercial applications, where it integrates seamlessly into any design.

There is a choice between different braking systems: retaining brake and Saheco's new SOFTPRO system, an exceptional solution for a smooth and quiet sliding action with an effective, powerful yet at the same time gentle soft closing and or opening action. In this way a pleasing aesthetic performance is combined with enhanced safety; fingers are protected from becoming trapped on the closing cycle of the glass panel, which itself is also protected from impact damage.

SOFTPRO®
TECHNOLOGY by Saheco

The new soft-closing technology from Saheco which combines two nitrogen gas fillled pistons and one oil fillled piston all within the same unit.

- Fully adjustable closing speed
- Closing action is progressive and slows down as the door approaches the fully closed position
- Soft Closing
- Anti break feature on the trigger
- Ensures safe braking and prevents bouncing of the door.
- Combines an aestheticallly pleasing action with safe sof closing for door
